OBJECTIVE

Apply what I've already learned independently to an organized team environment, while getting first hand experience with the latest web technologies and working towards becoming a full stack developer.

TECHNICAL SKILLS

Proficient Front End Technologies

HTML5 CSS3 Javascript JQuery Bootstrap Git

Other Minor Technology Experience

Ruby on Rails, Ruby, Ruby Gems

PROJECT EXPERIENCE

KF2Calc

Single Page Web Application for a popular video game

<https://tor020.github.io/Killing-Floor-2-Calculator/>

- Conceptualized and developed independently of others and hosted through Github pages
- Utilizes bootstrap fully supporting a mobile friendly design resizing for all screen sizes
- Google Analytics and Adword Integration
- Communicated directly with userbase through reddit.com implementing new features and bug fixes based on requests.
- A minimum of 50 hours debugging various components and utilizing JQuery Documentation Chrome Dev Tools and stackoverflow.com for solutions.
- Primary Technologies Used: HTML5, CSS3, Javascript, JQuery, Bootstrap, Git

Pong Demo

Full Featured Javascript Game

<https://tor020.github.io/Pong/>

- Core game built entirely with Javascript on an HTML5 Canvas element. Demonstrates familiarity with both technologies
- Challenging but fair AI. Player paddle controlled with mouse movement
- All of the same core game play elements of the original
- Primary Technologies Used: HTML5, Javascript

EDUCATION

freeCodeCamp

<https://www.freecodecamp.com/tor020>

2016 — 2017

Lorain County Community College

2010 — 2012
